

Class-Based Modeling

Identify Class and Attributes

Step-1: Identifying and categorize all nouns

External Entities	Student, Faculty, Database, Interface, User
Things	Report, Interface, E-mail, Button, Fine, Password, Message, Item
Occurrence or events	Search, Issue, Retrieve, Renew, Update, Configure, Booking, Generate Report, Return
Roles	Administrator, Librarian
Organizational units	Department/Institute, Item type, User type
Places	Item location
Structures	System, Internet, Server, Computer

Step-2: Selection of potential class

Selection characteristics:

1. Retained information
2. Needed services
3. Multiple attributes
4. Common attributes
5. Common operations
6. Essential requirements

Potential Class	Characteristic Number That Applies
Student	Rejected: 3 fails
Faculty	Rejected: 3 fails
Database	Accepted: all apply
System	Accepted: all apply
Interface	Rejected: 1,4,5 fails
Report	Rejected: 1,3,6 fails
E-mail	Rejected: 1,3,6 fails
Password	Rejected: 3 fails
Button	Rejected: 1,3,5,6 fails
Fine	Rejected: 1,3,4,6 fails
Administrator	Accepted: all apply
Librarian	Accepted: all apply
Item	Accepted: all apply
Search	Rejected: 3 fails
Issue	Rejected: 3 fails
Retrieve	Rejected: 3 fails
Renew	Rejected: 3 fails
Booking	Rejected: 3 fails
Update	Rejected: 3 fails
Department/Institute	Rejected: 4,5,6 fails
Location	Rejected: 3 fails
Type	Rejected: 3 fails
User	Accepted: all apply
Server	Rejected: 3 fails
Computer	Rejected: 3 fails
Internet	Rejected: 3 fails
